PROFILE

QA/QC Engineer and PMC Consultant with over eight years of experience across contractor and consultant environments in Saudi Arabia and India — from hydroelectric infrastructure and international airport construction to mega mixed-use developments and automotive manufacturing facilities.

Represents client and PMC interests on site: reviewing technical submittals and shop drawings, developing and enforcing Inspection & Test Plans, managing non-conformances through to closure, and coordinating with contractors and consultants to keep projects moving without compromising quality. PMP® certified, professionally accredited by the Saudi Council of Engineers, and Lead Auditor trained in ISO 9001:2015 quality management systems.

CORE EXPERTISE

PMC / Consultant QA/QC Practices · Technical Submittal & Shop Drawing Review · ITP & Method Statement Approval · NCR Management & Corrective Action · Quality Audits & Compliance Monitoring · Client & Stakeholder Coordination · Material Inspection & Testing · Standards: ASTM, ACI, BS, ISO · Snagging, De-snagging & Handover · Utility Infrastructure · Excavation, Backfilling & Waterproofing · Structural & Geotechnical Principles

PROFESSIONAL EXPERIENCE

Senior QA/QC Engineer — Compass Project Consulting (PMC)

Dec 2025 — Present

Buraidah Tijan Mall · Buraidah, Saudi Arabia

- Represents the PMC in ensuring contractor compliance with specifications, IFC drawings and approved ITPs.
- Reviewed and approved 100+ technical submittals — method statements, materials and shop drawings.
- Runs 20+ weekly inspections across structural, architectural and finishing works.
- Leads NCR management from root-cause analysis through closure.
- Oversees landscaping and external works — paving, kerbs, irrigation, grading and drainage.
- Travels to equipment suppliers' factories to witness acceptance testing before shipment to site.

QA/QC Engineer — Modern Building Leaders (MBL)

Dec 2024 — Dec 2025

CEER Automotive Project · King Abdullah Economic City, Saudi Arabia

- Led quality control for structural and concreting works on a new automotive (EV) manufacturing facility.
- Prepared and implemented ITPs and method statements for concreting, excavation, waterproofing and repair works.
- Conducted material testing and inspection for concrete, soil and other construction components.
- Ensured timely Work Inspection Request approvals; maintained detailed NCR and corrective-action records.
- Supervised site engineers, technicians and contractors for scope and safety alignment.
- Developed handover and maintenance documentation, including test reports and final submission packages.

QA/QC Engineer — Modern Building Leaders (MBL)

Jun 2024 — Dec 2024

Yamhama Palace · Riyadh, Saudi Arabia

- Led quality control for structural and concreting works to specification and client requirements.
- Conducted material testing and maintained WIR / NCR records.

QA/QC Engineer — First Fix KSA ★ FLAGSHIP PROJECT

Jan 2023 — Jun 2024

King Salman Park · Riyadh, Saudi Arabia — a Saudi Vision 2030 giga-project, on completion expected to rank among the largest urban parks in the world

- Managed QA/QC for excavation, backfilling and installation of sanitary, storm, firefighting and potable/chilled water utility systems.
- Conducted site inspections, material testing and as-built documentation across the utility-works scope.

QA/QC Engineer — Larsen & Toubro

Jul 2019 — Jan 2023

Navi Mumbai International Airport · Navi Mumbai, India

- Prepared, reviewed and enforced QCPs, ITPs and Method Statements for runway works to ICAO / FAA standards.
- Issued and followed up NCRs; participated in client, consultant and internal quality audits.

Site Engineer, Intern — Hindustan Construction Company (HCC)

Sep 2018 — Jul 2019

Kishanganga Hydroelectric Project · Jammu & Kashmir, India

- Assisted construction planning and execution of hydroelectric tunnels, dams and power infrastructure — first hands-on exposure to formal site quality control procedures.
